

At Drs. Sehy and Jones Optometrists, the entire health of your eyes is of the utmost concern. For your convenience and in your best interest, we offer all patients the opportunity to take advantage of our **elective**, non-dilation **Hi-Tech Retinal Examination Package**: two complete tests for a **discounted fee of \$39!** (insurance ineligible)

*\*Your doctor recommends that all patients age eighteen and older elect for the retinal screening package to ensure the entire health of your eyes- even if you think you are seeing well\**

The Optos Optomap allows an ultra-widefield retinal imaging. Taking high-resolution multi-colored photos, the Optos Optomap allows optometrists to fully examine the back of the eye and utilize the image for an education tool for their patients.

The ZeaVision QuantifEye Macular Pigment Optical Density (MPOD), allows optometrists to assess a key Age-Related Macular Degeneration factor: macular pigment. In addition to its aid in the monitoring and screening of AMD, this test also monitors other visual performance challenges.

**YES:** I would like to take advantage of the elective Hi-Tech Retinal Package

\_\_\_\_\_ (please print name)

**NO:** I choose to opt out of the elective Hi-Tech Retinal Package
